

# FATCAKE

**PINKPAPER**

---

The FATCAKE Whitepaper aims to educate readers on our vision, strategy and roadmap. Below we illustrate in detail our unique redistribution mechanism. Safemoon was the one to bring awareness around RFI and HODL rewards. FATCAKE will carry the innovation torch forward with perfected tokenomics and the fattest reflections.

## **Overview**

FATCAKE is the next evolution of a yield-generating contract on the Binance Smart Chain(BSC): you get rewarded 10% in CAKE instead of tokens. The token contract employs a static rewards system, 15% of every transaction is split in three: 10% CAKE is redistributed to fatten holders CAKE, 3% is allocated to the marketing fund, and 2% is used to fatten the liquidity pool.

## **Redistribution**

We created a unique system that auto-claims a fat piece of CAKE for every holder. We call it the FATCAKE PROTOCOL. Every 60 minutes you'll automatically receive a fat CAKE reward in your wallet just for holding. Not a single action is required. Your FATCAKE token amount is persistent and will not change.

## **Behind FATCAKE**

The token is based on a Dividend-Paying Token Standard, which means all CAKE the contract gains will be split equally and proportionally to all token holders. The contract keeps track of an array of all token holders, as well as an index into the array for processing. Each time a transaction is processed, the contract checks how many withdrawable dividends a user is holding. If it is above the minimum threshold for auto-claims, the contract will automatically claim those dividends for CAKE. This system is fully automated and doesn't add minimal gas fees proportional to value transferred. The number of holders processed through each transaction is dynamic and based on the transaction size. Holders will receive dividends from the queue based on their position in the array. It's a fair, fully automated system. The minimum token balance is 200,000 FATCAKE tokens to receive 10% CAKE distributions.

## **Security of FATCAKE**

**Locked Liquidity** Initial liquidity will be locked for a minimum of 1 year to provide holders with a fat peace of mind that the token can always be exchanged. A trusted 3rd party, Dxlock, will operate as the middle man to ensure that all raised liquidity is locked in a fat locker for the full timeframe.

## **DEX Public Listing**

Following the presale, FATCAKE tokens will become available for purchase on PancakeSwap.

## **Token Information**

**Network:** Binance Smart Chain (BEP-20)

**Ticker:** FATCAKE

**Contract Address:**

**Decimals:** 18

## **Fair Launch**

**Total Supply:** 100,000,000,000

**Tokens for Presale:** 37,500,000,000 (37.5%)

**Tokens for Pancake Listing:** 62,500,000,000 (62.5%)

**Fair Launch:** 28 July at 6 pm (UTC)

**Liquidity:** 100% locked for 1 year through DxLock

## **Other Features**

Anti-Dump Logic Price protection features such as max transactions are included. A 3% Max Wallet is baked into the contract to ensure that no whale gets too fat.
